JOB TRAINING PARTNERSHIP ACT (JTPA) RELEASE NOTES SERVICE DELIVERY AREA (SDA) RELEASE 3.22.0

Welfare-to-Work (WtW) Module

Programs modified:

Log # 4815 (EWTF) Enter WtW Termination Form

This program is modified to change the options in item 03, Increased Wages, from “Y” or “N” to “1” or “2.” This was done to assure that this item captures information in a manner consistent with the rest of the WtW forms.

Logs # 4831 & 4834 (PWSR) Print WtW Status Roster

This program is modified to change the description of participants in the summary portion of the report. “Participants Enrolled” is changed to “Participants Served.”

This program is corrected to display dates in the “Date Employed” field of the report only if there is an associated date on the employment record. This field was incorrectly showing dates for all clients.

Logs # 4821 & 4839 (XWPD) Extract WtW Individual Participant Data

This program was modified to create a report similar to XIPD that will appear in the Report Input/Output Handler (RIOH). The report will display number of records, date and time transmitted, and the file name. It was also modified to correct two-field lengths in the case record format.

Log # 4818	(PWRF) Print WtW Registration Form
Log # 4810	(PWEF) Print WtW Enrollment Form
Log # 4811	(PWTF) Print WtW Termination Form

Three new programs were added to the WtW module. These programs will allow Job Training Automation (JTA) users to print out forms associated with the WtW program once the forms are completed. These forms are included on the WtW Reports Menu (MWRP). They can be created, viewed, and printed in the same manner as all other JTA reports.

Scripts

Four scripts will be run with this release.

One script will update the values for incr_wgs in the wtw_term table. Values that were “Y” or “N” will be changed to “1” or “2.”

Three scripts will be run to insert the PWRF, PWEF, and PWTF information into the mne_info, access_lvl_info and menu_info tables.
